

How to make the whale speaker

① Spread to about 5mm the clay with a cotton swab.

② Cut out against the type.

③ Wrapped around the foundation.

④ Cut out the bottom portion in a circular.

⑤ Put on the bottom.

⑥ Well adapt. Cracks are smooth with a water.

⑦ Make the tail. (a little thicker is better so fragile)

⑧ Stick to the body.

⑨ Place the smartphone, determine the position of the hole.

⑩ Big a hole slightly than the smartphone. (Shrink and burn)

⑪ The corners of the hole adapt well because the fragile.

⑫ Paste the eyes and fins of the parts. (Fin will be the role of the support)
